BOYNS INFORMATION SYSTEMS ACHIEVES ISO 9001 REGISTRATION FROM THE BRITISH ASSESSMENT BUREAU

Ruthin based IT company Boyns Information Systems has achieved the internationally recognised ISO9001, establishing it as one of the leaders in its field.

This independent assessment was conducted by the leading Certification Body, the British Assessment Bureau and demonstrates Boyns Information Systems commitment to customer service and quality in delivery.

Boyns Information Systems has now earned the right to display the coveted British Assessment Bureau ISO 9001 certification mark to demonstrate its conformance to the standard.

ISO 9001 was first introduced in 1987 and requires organisations to demonstrate that they do what they say they do and that they have a quality management system in place to ensure consistency and improvement; leading to high levels of performance and customer satisfaction. Certified organisations are committed to continuous improvement and are assessed annually to ensure progress is being maintained.

Boyns Information Systems has shown that it has good reliability and process controls which means lower costs for its customers!

Boyns Information Systems Director said, "We are particularly pleased to have achieved ISO9001 certification as it underlines our commitment to our customers and our focus on quality. Not many customers get to see their suppliers' 'back-office' activities. This recognition demonstrates we can provide a quality solution from quotation to delivery."

The benefits of registration to the ISO9001 standard include:-

- Streamlining an organisation's procedures.
- Bringing consistency to an organisation's service delivery.
- Reducing cost and rework.
- Improving an organisation's management practices.
- Enhanced status.
- Competitive advantage.
